

K-0750 | Pruning shears

These unique pruning shears (Cut and Hold) are designed to directly grip the cut part so that it does not fall to the ground. This is particularly suitable for pruning or harvesting roses. The aluminum scissors feature an open spring to prevent dirt from piling up in the spring. To minimize friction, the cutting blade is Teflon coated. These Cut and Hold scissors can handle branches up to a maximum of 7mm. Also, the upper blade has a notch for cutting wire. Ideal for the florist.

SKU:

K-0750

Length:

215 mm

Weight:

245 gram

EAN code:

8715397003115
